

## 539. WE-Heraeus Seminar on Micro- and Nanostructured Interfaces for Biological and Medical Research

June 30 – July 3, 2013

Physikzentrum Bad Honnef, Germany

Poster  
prize!

### Speakers:

Eduard Arzt

Martin Bastmeyer

Aldo Boccaccini

Michael Dustin

Peter Fratzl

Huajian Gao

Jay Groves

Michael Grunze

Rainer Heintzmann

Ulrich Nienhaus

Jacques Prost

Markus Sauer

Prasad Shastri

Molly Stevens

Viola Vogel

Dave Weitz

### Sessions on:

- General biophysical concepts: Physics of soft condensed matter
- Nanotechnology and Nanosciences: Role of spatial organization for the biological signal transduction
- Super resolution microscopy and new optical methods for the characterization of micro and nanostructured interfaces
- Replicating Nature: Engineering biomimetic materials for biological and medical applications

Meet the speakers:  
round table  
discussions

### Organizing Committee:

Cornelia Lee-Thedieck

Joachim P. Spatz

Christof Wöll
